

CUSTOM DIGITAL DYED PRINTING

High Quality Digital Dyed Printing for Your Custom Product Requirements

CUSTOMZONE DIGITAL DYED PRINTING

Nothing else catches that special spirit-image of your business, corporation, school, government agency, city, civic group, organization, or special event as a custom made flag or banner.

Your unique, one of a kind, flag or banner design expertly manufactured with quality fabrics and precision craftsmanship, whether for one or a hundred units.

Our strong experience, quality, service, and delivery will make you proud of your high-flying custom made flag or banner.

The benefits of Digital Dyed Printing include the ability to print one-off custom flags, banners and other products quickly and economically. Our large format digital printer produces brilliant colors, high front-to-back penetration and excellent resolution. We print your artwork on 200 denier, UV resistant nylon using acid dye inks to generate durable, fade and wear resistant, high resolution products that are sure to generate repeat business from your customers.

Digital printing is produced from electronic images, which eliminates expensive screen charges. The result is that digital printing is much more economical for low quantities (1-99). In addition, digital printing can typically be turned around within 10-12 workdays (after acceptance of artwork).

Wide format digital printing expands the number, sizes and types of products you can offer, including flags, indoor and outdoor banners, feather flags, trade show back-drops, table-drapes, etc.
